

BUGGY COVER FOLDING INSTRUCTIONS

Step 1: Remove cover from golf cart. Make sure all zippers are closed. Two people are needed, one on each end. Hold the cover as if it were still on the golf cart.

Step 2: This step is the most important. Tuck the front windshield and back panel in towards the middle and bring the sides together. Be sure the top of the “tucked in” sections are even with the top of the rest of the cover (see image 2.2).

Step 3: Lay the cover on a dry, non-scratch surface. Be sure to keep the clear vinyl as flat as possible.

Step 4: Fold the cover in thirds using the zipper seams as your folding points. As a reference point, place your carrying case nearby to be sure the folded position is the same size as your bag.

Step 5: Fold the bottom area of the back panel about 18 inches in toward the middle of the cover.

Step 6: Fold the cover in half - again, using your carrying case as a reference point. If it's too wide, go back to Step 5 and fold more of the bottom section in. Slide your cover into your bag.

NOTE: DO NOT store your Buggy Cover wet, this will create mold, mildew, etc.
