

E-Z-GO TXT 3-SIDED & 4 PASSENGER INSTALLATION INSTRUCTIONS

Step 1: Replace factory windshield plastics with new set provided. The protruding ribbed flange is positioned on the outside of the strut facing the rear of the cart.

Step 2: Install the front fabric panel onto the windshield plastics by pressing the rubber extrusion onto the ribbed flange. Wrap the fabric straps around the windshield struts and secure with Velcro.

Step 3: Install the cover over the top of the cart. Connect to the front panels with zippers and secure to the bottom of the cart with jam cleat bungee hooks.

For the 4 Passenger model, installation is complete.

Step 4: For the 3-Sided model, the rear window is secured to the cover with three snaps along the upper edge of the window. The sides of the window are zippered onto the cover. If the rear window is installed with a Cabana bag cover, the side snaps are not used. The center strap is used in the second longer position.

The 3-sided installation is complete.
